Santa Fe Springs, CA 90670-8235

Dear Chris,

The Morgan Stanley Children's Hospital is delighted to participate in the upcoming Debt Connection Symposium and Expo 2007 Black Tie Tribute Awards and Charity Dinner, as one of the beneficiaries of the auction along with Children's Hospital of Orange County.

Funds raised through auction proceeds will be used to support the Center for Children's Health Advocacy at the Morgan Stanley Children's Hospital. The Center for Children's Health Advocacy serves to convene community-based organizations, healthcare professionals, families, institutions, educators, researchers, and corporations to better understand the issues affecting the health and welfare of children, and to advance and shape policies and programs for positive change. The Center also supports research, development, and dissemination of child-focused and family-centered strategies to improve the health status of all children.

Each year, thousands of parents throughout New York and the world bring their children to the Morgan Stanley Children's Hospital. Dedicated to providing easily accessible, high quality and family-centered care, the Children's Hospital is committed to meeting the special needs of children and their families in a safe, trusting and nurturing environment.

Additionally, the Morgan Stanley Children's Hospital has become one of the world's major academic medical centers for clinical pediatric research. These programs have made extraordinary contributions to the understanding of childhood diseases as well as to their prevention and treatment.

We look forward to partnering with Resource Management to raise awareness and support of the important work that our physicians, nurses and staff provide to children.

Best Wishes,

Cynthia N. Sparer
